SUMMARY

Senior Software Developer with 6 years building React.js, Next.js, and React Native products end-to-end, across project management, logistics, community management, insurance, and e-commerce domains. Owns features from data modeling and API design through UI implementation, state management, and app-store release, on both web (Redux Toolkit, Zustand, React Query) and mobile (Expo, React Native) codebases, working across the Node.js/Express backend layer when a feature needs it.

TECHNICAL HIGHLIGHTS

- Owns the state architecture (Redux Toolkit, Zustand, React Query) for BK Sales Platform's web console and its companion Expo/React Native app
- Built 15+ feature modules and shipped CommCorner, a community-management app, to both the App Store and Google Play via EAS Build
- Built the Gantt-chart and 100,000+ record data-grid system (React Window) for CLIMOVA, an enterprise project-management platform
- Built the geo-spatial logistics tooling and driver-facing React Native app for LOGIT

PROFESSIONAL EXPERIENCE

Senior Software Developer — React.js & React Native

Aug 2023 – Present

Omnics Technologies Pvt Ltd — Hyderabad, India

- Built BK Sales Platform's web console state layer using Redux Toolkit, Zustand, and React Query across 10+ interconnected modules (tasks, scheduling, documents), cutting out redundant API calls and stale-state bugs
- Built a drag-and-drop task/scheduling board (react-dnd, react-beautiful-dnd) with an integrated PDF viewer and a multilingual UI (react-intl) for simultaneous multi-locale launch
- Built the BK Sales mobile app's data layer using a repository pattern (services/repositories/http vs mock), decoupling screens from API state so new backend contracts plug in via a single flag with no screen-level changes
- Implemented persistent OAuth authentication (password + refresh-token grant) using Expo Secure Store and AsyncStorage, keeping sessions alive across app restarts
- Built 15+ feature modules for CommCorner — attendance, gate-approvals, dues, amenities, staff-settings, access-requests, facility-reports, events, notifications — as isolated feature domains for a multi-developer team
- Integrated the PhonePe payment gateway for dues collection and built PDF generation/viewing for receipts and reports, replacing a manual spreadsheet-based billing process
- Implemented push notifications using Firebase Cloud Messaging and Notifee, and added document scanning and QR-code workflows for gate/visitor approvals in CommCorner
- Took CommCorner through Play Store and App Store release readiness using EAS Build/Submit pipelines and config-plugin-based native builds, and wrote the release runbook the team uses going forward
- Built a Gantt chart system and virtualized data grids (React Window) for CLIMOVA, handling datasets of 100,000+ records, plus role-based dynamic dashboards and real-time solar energy monitoring dashboards (Apex Charts) with multilingual support
- Built a geo-spatial tool (Google Earth/Maps) for LOGIT to draw custom polygons and calculate item capacity per region, an invoicing engine and PDF pipeline, and a companion React Native app with real-time Firebase chat between drivers, operators, and management
- Designed a chat UI (AI Chatbot Interface) supporting code, table, and conversational response formats, with an optimized retrieval layer for fast conversation history search

Software Engineer

Oct 2021 – Jul 2023

Azentio Software Pvt Ltd — Hyderabad, India

- Extended a production insurance portal (FWD Insurance Portal) to support claims, policy management, fund switching, and beneficiary updates, resolving critical CRs blocking releases
- Streamlined multiple customer request workflows, improving reliability and portal efficiency
- Coordinated weekly/monthly delivery reporting with stakeholders

Software Developer

Sep 2020 – Oct 2021

SUGAR Cosmetics — Hyderabad, India

- Built a mobile-first, SEO-optimized e-commerce storefront (login, cart, wishlist, checkout) integrated with backend APIs and checkout flow
- Built a real-time influencer earnings dashboard with search, filtering, and pagination for high-volume order data
- Automated commission payout calculation from promo codes and order tracking, replacing manual reconciliation

SELECTED PROJECTS

BK Sales Platform — Web + Mobile (React.js, Redux Toolkit, Zustand, React Query, Expo, React Native) — Sales/field operations platform for BitKollegen: a React web console with drag-and-drop scheduling, PDF viewing, and multilingual support, plus a companion Expo/React Native app built on a repository-pattern data layer with persistent OAuth authentication.

CommCorner — Community/Society Management App (Expo Router, TypeScript, NativeWind, Firebase) — Native iOS/Android app covering attendance, gate approvals, dues, amenities, staff management, and facility reporting across 15+ feature modules, with PhonePe payment integration, push notifications, document scanning, and QR-code workflows. Shipped to both the App Store and Google Play via EAS Build.

CLIMOVA — Enterprise Project Management Platform (React.js, React Window, Apex Charts) — Gantt-chart based project management platform with role-based dashboards and real-time solar energy monitoring, built to handle data grids of 100,000+ records.

LOGIT — Logistics Management Solution (React, Node.js, React Native, Google Maps) — Admin web app for geo-spatial capacity planning and invoicing, plus a driver-facing React Native app with real-time Firebase chat.

AI Chatbot Interface (React.js, Node.js) — Internal AI chat product with a multi-format (code/table/conversational) response renderer and an optimized conversation-history retrieval layer.

FWD Insurance Portal (React.js, Node.js) — Enterprise insurance portal supporting claims, policy management, fund switching, and beneficiary management.

E-Commerce Platform & Influencer Dashboard (React.js, Node.js, AWS) — Mobile-first storefront plus a real-time influencer earnings dashboard with automated commission payouts.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, Context API, React Query / TanStack Query, TailwindCSS, HTML5, CSS3, Responsive Design, Cross-Browser Compatibility

Mobile Development: React Native, Expo, Expo Router, NativeWind, iOS & Android, Native Modules, Firebase Cloud Messaging, Secure Storage, Push Notifications, App Store & Play Store Deployment (EAS Build)

Backend & Data: Node.js, Express.js, REST APIs, WebSockets, Prisma, Serverless Architecture, PostgreSQL, MongoDB, Redis, SQL

Cloud & DevOps: AWS (S3, EC2, Lambda, CloudFront), Firebase, Jenkins

DevOps & Tooling: GitHub Actions, CI/CD Pipelines, Continuous Integration & Deployment, Git, Scalable System Design, Technical Documentation

AI / LLM: LLM-Powered Product Delivery, Conversational / Chat UI, Multi-Format Response Rendering, AI-Assisted Development (Claude Code, GitHub Copilot)

Testing & Quality: React Testing Library, Unit / Integration Testing, Code Reviews, Quality Assurance, Performance Optimization

Tools & Process: Git/GitHub, Jira, Postman, Agile/Scrum, i18n/l10n, RBAC

EDUCATION & ACHIEVEMENTS

Bachelor of Technology (B.Tech), Computer Science — JNTUK, 2014 – 2018
3rd position, Masai Hackathon

Recognized by product management and engineering leadership for consistent on-time, high-quality delivery across multiple production releases
